

The Best Features of WaveRunner Rentals

WaveRunner rentals refer to the trademarked name of personal watercraft made by the Yamaha Motor Company. The vehicle has been so successful that the term WaveRunner has become a generic name for various types of fast-moving watercraft. The type of vehicle was first introduced in the year 1987. There were two versions: a standup and sit down boat.

The newest WaveRunners, such as the 2010 WaveRunner VX model, have very luxurious features. Most new models have three seats as well as a 1052 engines or above. This type of boat was produced using nanotechnology, which allows the production of a high-powered vessel that is still very lightweight. This technology is exclusive to the Yamaha company. With this technology, WaveRunners are made to be small, light and durable and yet still accelerate with top speeds.

WaveRunner rentals are very fast watercraft, and should be operated by responsible (and sober!) drivers. Some of these models can travel over 60 miles per hour on the water. However, the newest models also have additional features that will be of interest. Some WaveRunners have water and outdoor temperatures, reverse RPM control (which prevents over revving of the engine and keeps you at the right speed), telescopic steering, cruise mode (to avoid fatigue), no wake mode which lets you stay at a low speed, and watertight storage compartments.

Rental companies will offer a variety of these watercraft from various manufacturers, including Seadoo rentals. Don't be surprised though if many top rental companies only deal with Yamaha, since they have built the industry standard. Many of the newer WaveRunner rentals are built with four-stroke engines, which are electronically fuel injected, and thus more efficient in using gas and releasing emissions. Jetski rentals, particularly the SuperJet model is an exception, it having a carbureted engine.

The big question is, technical specs aside, how can you use this fast-moving water-bike? Anything but fishing is our recommendation. It's a lot of fun if you are single and hitting the town. It is fun for two lovers on a romantic vacation. You could even take along a third person since many WaveRunners seat a total of three individuals.

The Lake of the Ozarks is a very large body of water. You will need to walk miles and miles if you travel by land only. Use WaveRunner rentals to cut short the walking time—and enjoy a wonderful boating experience!
